

We offer Invisalign at Park Road Dental Care- The World's first clear aligner system. These 'braces' are comfortable, removable and nearly invisible.

Jane Foster uses the 'Invisalign Go' system which just moves the front 10 teeth in each jaw. This means that the bite is maintained, and that the treatment is usually completed in under a year. Only Invisalign clear aligners use SmartTrack® material to shape your smile with such precision, comfort and predictability. 'Clincheck' technology digitally maps your Invisalign journey, so Invisalign patients can see what their new smile is predicted to look like before treatment even begins.

Please contact Jane Foster for a free consultation.
